About me

I'm a front-end leaning engineer with 8+ years of experience building high-quality web and mobile applications. I have a strong eye for detail and strive for pixel-perfect implementations. I enjoy close collaboration with product and design to craft the best user experiences. I specialize in React, React Native, and stay up to date with modern AI and agentic development workflows to build smarter and faster.

Technologies I like

React	GraphQL
React Native	NodeJS
Typescript	NestJS
NextJs	Figma
Expo	Python
Tailwind	Jest, Cypress
React-Query	Unity, C#

Education

2017	Syntra brussel
—	Full Stack developer
2015	Artevelde Hogeschool
2015	Graphic and Digital media
—	
2012	

Hobbies

Playing music, gaming, game development, fitness and learning new skills

Employment

Now	Front End Engineer - MoonPay
—	
2021	- Contributed across multiple product teams including the MoonPay website, account dashboard, and mobile app. - Built major app features like the discoverability tab (DeFi tokens, charts, market data), social features, web3 account importing, staking and much more. - Created a number of AI skills to automate parts of the process and ship faster with higher quality. - Improved performance and responsiveness across app and web through targeted optimizations. - Collaborated with designers and backend teams to ship cohesive, scalable interfaces and maintain a shared design system. - Integrated CMS/CRM systems like HubSpot, Contentful and Braze. - Worked closely with SEO and QA to improve visibility and accesibility for our web platform to bring MoonPay to the top of the google rankings.
2021	Full Stack Developer - Tangent Works
—	
2020	- Developed the front end of Tangent Works' time-series analytics platform using React GraphQL. - Created and maintained the python package tim-studio for users to have a simplified way to interact with our microservice architecture.
2021	Full Stack Developer - A&C Systems
—	
2020	- Created and Maintained web shops for multiple Belgian internet providers in PHP - Developed and maintained SaaS projects using React, MUI & Symfony
